## Monsanto Claims Deadline Extended

Monsanto has extended the deadline for the Trait Crop Loss Program from August 31 to September 30 in order to provide producers more time for insurance adjustments and to obtain and file necessary paperwork. This is a 2011 one-time deadline extension, granted at the request of cotton growers. Guidelines to qualify for Crop Loss benefits are as follows:

- The producer must have purchased Monsanto Trait technologies from an authorized dealer and must meet all requirements of the Roundup Rewards Program.
- The acres claiming crop loss benefits must be destroyed for the crop loss claim to be paid and is subject to verification.
- Any form of harvesting of affected acres will void the right to claim a Cotton Technology Crop Loss benefit.
- **The extension applies only to irrigated acres due to severe drought conditions.** Any other form of loss (wind, hail, flood, disease, pests, etc.) is not eligible for settlement under this submission deadline extension.

A Talkin' Cotton news release has been generated pertaining to the Monsanto Crop Loss claims deadline extension and is below.

*Monsanto is extending the Trait Crop Loss Program submission deadline for cotton from August 31, 2011, to Sept. 30, 2011, for growers in Oklahoma, West Texas, Kansas and New Mexico, according to Harvey Schroeder, Executive Director of the Oklahoma Cotton Council.*

*This extension applies to all Monsanto products with Genuity cotton traits regardless of the brand of cottonseed, according to John C. Combest, Monsanto spokesman. "We are extending this date at the request of cotton growers to allow crop insurance adjusters additional time to verify their loss before the farmers destroy the field. The Sept. 30, 2011, date is the last date possible for claims to be filed and considered for crop loss reimbursement," he said.*

*Farmers must have purchased Monsanto Trait technologies from an authorized dealer and must meet all requirements for Roundup Rewards. The acres claiming crop loss must be destroyed for the crop loss to be paid and is subject to verification.*

*Any form of harvesting of affected acres will void the right to claim a cotton technology crop loss benefit. This extension is to accommodate the extra time needed to validate claim losses on irrigated acres due to severe drought conditions growers experienced this year. Acres that experienced yield reduction or crop destruction attributable to wind, hail, flood, disease, pests or any other reasons during this extension period are not eligible for settlement under this submission deadline extension.*

*This change will have no impact or change in the deadlines and requirements for Drought Relief program submissions on dryland cotton acres.*
